

# Ubaid Umer

AWS Certified Solutions Architect · Senior Software Engineer & Team Lead

Email: [ubaid.umer55555@gmail.com](mailto:ubaid.umer55555@gmail.com) | Phone: +92 320 1238891

LinkedIn: [linkedin.com/in/ubaid-umer-98b5b2203](https://www.linkedin.com/in/ubaid-umer-98b5b2203)

## PROFESSIONAL SUMMARY

Senior Software Engineer and Team Lead with 5+ years of experience architecting and delivering scalable web applications using the MERN stack and NestJS microservices. Skilled in leading cross-functional teams, optimizing performance, and leveraging AWS to build secure, resilient systems. Proven expertise in async job processing (BullMQ, SQS, RabbitMQ), media pipelines, and shipping production features in agile environments.

## SKILLS

**Languages:** JavaScript, TypeScript, SQL

**Frontend:** ReactJS, NextJS, T3 stack

**Backend:** NodeJS, ExpressJS, NestJS, Serverless Framework

**Databases:** MongoDB, MySQL, PostgreSQL, Redis

**Cloud:** AWS (IAM, EC2, S3, Route53, CloudFront, Lambda, RDS, DynamoDB, VPC, API Gateway, MediaConvert, SQS, SNS, KMS, CloudWatch), Docker, Heroku

**ORM & Validation:** Sequelize, TypeORM, Mongoose, Prisma, Joi, Yup, Zod

**Messaging:** Kafka, RabbitMQ, SQS, SNS, REST APIs, GraphQL, gRPC, tRPC

**Tools:** Trello, JIRA, Git, Bitbucket, GitHub, Postman, Swagger

## CERTIFICATIONS

AWS Certified Solutions Architect – Associate (SAA-C03)

## WORK EXPERIENCE (5+ YEARS)

### Tripvlog — Software Development Team Lead

Dec 01, 2025 – Present

Travel / creator media platform · NestJS microservices

- Leading backend architecture for Tripvlog across NestJS microservices (**backend** and **media-service**), covering property inventory, bookings/commission, social video posts, and admin reporting.
- Designed scalable worker processes separated from the HTTP API, using **BullMQ + Redis** for scheduled and on-demand jobs, and **AWS SQS** for video ingest with DLQ handling and visibility-timeout heartbeats.
- Built property sync workers for **Hyperquest** and **RateHawk** incremental catalog/reviews sync, commission settlement, and property best-ratings refresh on standard/heavy queues.
- Owned end-to-end video pipeline: S3 upload, moderation, SQS-driven ingest, **AWS MediaConvert** HLS transcoding, auto-approval jobs, and idempotent duplicate-safe processing for horizontal worker scale-out.
- Implemented async admin report exports (creator performance, booking operations, revenue/commission) with job deduplication, Mongo status tracking, and S3 CSV delivery via BullMQ producers/consumers.
- Integrated service communication with **RabbitMQ** for user/property sync events, and mentored engineers on queue design, concurrency, and AWS deployment practices.

### CodingCops, Lahore — Software Development Team Lead

Sep 2024 – Jan 01, 2026

- Leading a MERN/NestJS delivery team with focus on scalable architectures and AWS cloud deployments.
- Client communication for requirements gathering and sprint planning; mentoring developers and unblocking complex technical challenges.

### Frizhub, Lahore — Software Development Team Lead

Sep 2022 – Aug 2024

- Guided project architecture discussions and optimized development workflows.
- Reviewed and improved code quality, mentoring developers to enhance performance.

**Fasset, Islamabad — MERN Stack Developer**

Mar 2022 – Feb 2023

- Built a legal P2P trading platform for crypto trading in Pakistan.
- Delivered frontend & backend apps with unit tests ensuring high code coverage.

**IT22, Islamabad — MERN Stack Developer**

Jan 2021 – Mar 2022

- Led frontend and backend development for web applications.
- Interfaced directly with clients to ensure requirements were met.

**Freelance, Lahore — MERN Stack Developer**

Feb 2020 – Jan 2021

- Delivered projects across health and service domains.
- Built Node.js applications with best practices for scalability.

**Cypher, Lahore — Intern MERN Stack Developer**

Nov 2019 – Feb 2020

- Developed RESTful APIs and integrated them into React applications.
- Improved data retrieval efficiency and user interaction.

**PROJECTS**

---

**Tripvlog (Travel & Creator Media Platform)**

- Architected NestJS backend + media microservices with dedicated worker processes for property sync, commission settlement, video ingest, and report exports.
- Implemented BullMQ/Redis and AWS SQS/MediaConvert/S3 pipelines for scalable async workloads and HLS video delivery.

**Cheezious (Food Chain Delivery System)**

- Architected and led full development lifecycle for multi-platform delivery systems (Admin Dashboard, Customer App, Rider App, Task Management App).
- Implemented microservices with Kafka and API Gateway; deployed via AWS, Docker, and Dokku using MongoDB and PostgreSQL.

**Fasset (Web 3.0 Eco-System)**

- Developed legal P2P crypto trading platform (React frontend, Express backend).
- Integrated KYC onboarding with Jumio and third-party services (Prismic CMS, Zendesk).

**Legacy Suite (Digital Assets & Ownership)**

- Delivered backend (NestJS + PostgreSQL) and admin portal (React); deployed via AWS, Vercel, and Dokku.

**Tour de Amsterdam (Bike Rental Solution)**

- Built rental platform using NestJS + MongoDB and React, with multi-language support.

**Vlog Makelaars (House Rental Solution)**

- Implemented rental solution with NestJS and React, including GraphQL APIs and multi-language UX.

**EDUCATION**

---

**COMSATS Lahore** (2017 – 2021) — B.SE, Software Engineering**PGC Lahore** (2014 – 2016) — F.SC, Pre-Engineering**EXTRA-CURRICULAR**
