Professional Summary

Senior Software Engineer and Team Lead with 5+ years of experience in architecting and delivering scalable web applications using the MERN stack. Skilled in leading cross-functional teams, optimizing application performance, and leveraging AWS cloud services to build secure, resilient, and high-performance solutions. Proven expertise in designing microservices, managing DevOps pipelines, and ensuring project delivery within agile environments.

Skills

Languages: JavaScript, TypeScript, SQL

Frontend: ReactJS, NextJS, T3 stack

Backend: NodeJS, ExpressJS, NestJS, Serverless Framework

Databases: MongoDB, MySQL, PostgreSQL, Redis

Cloud: AWS (IAM, EC2, S3, Route53, CloudFront, Lambda, RDS, DynamoDB, VPC, API Gateway, KMS, CloudWatch), Docker, Heroku

ORM & Validation: Sequelize, TypeORM, Mongoose, Prisma, Joi, Yup, Zod

Tools: Trello, JIRA, Git, Bitbucket, GitHub, Postman, Swagger

Messaging & Communication: Kafka, RabbitMQ, SQS, SNS, REST APIs, GraphQL, gRPC,

tRPC

Certifications

AWS Certified Solutions Architect – Associate (SAA-C03)

Work Experience (5+ Years)

CodingCops, Lahore (Sep 2024 – Present) – Software Development Team Lead

- Leading a MERN team with focus on scalable architectures and AWS cloud deployments.
- Client communication for requirements gathering and sprint planning.
- Providing solutions for complex technical challenges and mentoring team members.

Frizhub, Lahore (Sep 2022 – Aug 2024) – Software Development Team Lead

- Guided project architecture discussions and optimized development workflows.
- Reviewed and improved code quality, mentoring developers to enhance performance.

Fasset, Islamabad (Mar 2022 – Feb 2023) – MERN Stack Developer

- Built a legal P2P trading platform for crypto trading in Pakistan.
- Delivered frontend & backend apps with unit tests ensuring high code coverage.

IT22, Islamabad (Jan 2021 – Mar 2022) – MERN Stack Developer

- Led frontend and backend development team for web applications.
- Interfaced directly with clients to ensure requirements were met.

Freelance, Lahore (Feb 2020 – Jan 2021) – MERN Stack Developer

- Delivered projects across health and service domains.
- Built Node.js applications with best practices for scalability.

Cypher, Lahore (Nov 2019 – Feb 2020) – Inter MERN Stack Developer

- Developed RESTful APIs and integrated them into React applications.
- Improved data retrieval efficiency and user interaction.

Projects

Cheeziious (Food Chain Delivery System)

- Architected and led a full development lifecycle for multi-platform delivery systems (Admin Dashboard, Customer App, Rider App, Task Management App).
- Implemented microservices with Kafka and API Gateway, deployed via AWS, Docker, and Dokku.
- Ensured scalability and decoupling using MongoDB and PostgreSQL in separate microservices.

Fasset (Web 3.0 Eco-System)

- Developed legal P2P crypto trading platform (frontend in React, backend in Express).
- Integrated KYC onboarding with Jumio and third-party services like Prismic (CMS) and Zendesk (customer campaigns).

Legacy Suite (Digital Assets & Ownership)

- Delivered backend (NestJS + PostgreSQL) and admin portal (React).
- Deployed via AWS, Vercel, and Dokku ensuring high availability and reliability.

Tour de Amsterdam (Bike Rental Solution)

- Built a rental platform using NestJS + MongoDB (backend) and React (frontend).
- Added multi-language support and dynamic API messaging for internationalization.

Vlog Makelaars (House Rental Solution)

- Implemented rental solution with NestJS (backend) and React (frontend).
- Enhanced user experience with multi-language support and GraphQL APIs.

Education

COMSATS Lahore (2017 – 2021) – B.SE, Software Engineering

PGC Lahore (2014 – 2016) – F.SC, Pre-Engineering

Extra-curricular Activities

Esports and Strategic Gaming Enthusiast (Dota 2), Technology Learning, Technical Blog Writing
